Bespoke Training for the Hostile Environment

WHAT SETS US APART????

There are several factors which put us above the competition:

KNOWLEDGE & EXPERIENCE

Our team have lived and breathed the security and risk management of INGOs in some of the most complex environments.

ALTRUISM

We do not set out to make profit, we believe our mission is to enhance whatever you deliver in-country and enable project delivery to succeed

FLEXIBILITY

We can deliver training, consultancy entirely autonomously; we have the experience. If we don't.... we know someone who does; our individual reputations within the Third and Academic Sectors allow us to access the most credible sources of knowledge and experience

BESPOKE SERVICE

Up to date information
We don't prevaricate
We know time is short so there will be no 'Buzz Word Bingo'
We can deliver where you want us to.....

You hum it, we'll play it......

Our courses interconnect, they are building blocks which knit together, building knowledge and skills:

HEAT+

The recognised skills to operate in a Hostile Environment either collectively or individually. This course evolves as the situations you're likely to face evolve. This will give you the best possible idea of the worst possible outcomes and most importantly, what you can do about it.....

NGO Security & Risk Management

Equipping NGO staff with the lexicon, skills and ability to assess risk effectively, implement robust planning, resulting in extending the reach of organisations in a responsible way. How the funding within an organisation should be constructed if risk management is to address the duty of care obligations and be compliant to donor requirements.

Crisis & Disaster Management

The skills you need to handle whatever life throws at you at the sharp end; our courses use real incidents as the basis of our exercises – no holds barred, learning from experience. Rotate your senior staff in or out, building organisational capability, resilience and competences. Failing that we'll come to you.

In short we are among the best to advise what to do when things go wrong.

But preferably, we may help you avoid that situation.

It really can be that simple
